Claims

1. A type of outer sole of shoes characterized by the following facts: the outer sole of the shoes has plural bumps formed from a flat plate shaped base;

said base and bumps are formed integrally from resin and/or rubber, and a core material having plural holes passing through said resin and/or rubber is buried in said base.

2. The outer sole of the shoes described in Claim 1 characterized by the fact that said core material is buried in both the portions of said base where said bumps are formed and the portions of said base where said bumps are not formed.
